EXAMINER'S ACTION

Art Unit:

In the January 2, 1998 response at page 5, Applicant has asked for clarification concerning the declaration. Since amendments have been made to the claims and specification, a supplemental declaration is needed. Applicant filed the original declaration prior to the new rules now in effect. However, since Applicant's case is still pending, the supplemental declaration need only follow the new rules. Note that Applicant's original declaration, filed when the old rules were in effect, did not specify all the changes to the claims and specification. The original specification only recited one of several changes to the claims and specification. Such a recitation of one change is now acceptable under the new rules. Applicant should then only send in a supplemental declaration under the new rules. See 37 CFR 1.175(b)(1).

Applicant has made an offer to surrender the original patent, but has not yet done so. Applicant must surrender the original patent.

Cited as submitted by Applicant is Yamazaki (987). This reference has an earlier effective date than Applicant's priority date and recites semi-amorphous material. However, note that column 2, line 52, to col. 13, line 17 do not recite both a transistor and a light sensor electrically connected on the same substrate.

Serial Number: 08/558544
